Bibliography of Atlases

This bibliography identifies the atlases referred to in the map entries. All are in the Library of the University of Illinois at Urbana-Champaign (UIUC).

Each entry consists of bibliographical information followed by the UIUC Library call number and location within the Library. We have listed maps in the earliest edition found in the library. Occasionally we list maps in later editions of especially important atlases, such as Mercator and Ptolemaeus. Finally, we note any other editions of the atlas up to 1900 found in the UIUC library records.

Information for each atlas:

Author. The names are recorded according to the library's catalog (card form and online). Authors are sometimes publishers.

Title. In italics. We have abbreviated titles of some of the older atlases (indicated by ellipsis dots), but have retained enough information to identify the particular edition.

Edition. Noted if other than the first.

Place of Publication. For the older atlases (most up to the eighteenth century), we indicate the place name as it appears on the title page, which is often in Latin. For more recent ones, the place name is anglicized according to library usage.

Publisher. When not known, "n.p." is used.

Date. Multi-volume atlases usually span several years of publication, thus dates may be "1740-1762."

Number of volumes. Noted if more than one.

Call Number. The call number is given without spaces, conforming to the UIUC online catalog. "Uncat" signifies the atlas is not catalogued, although available.

Locations are separated from the call number by a slash, and are abbreviated thus:

clx	Classics library
ihx	Illinois Historical Survey
max, mar	Map and Geography library
rbx, rbc, rbs	Rare Book Room
stx	Stacks

Brackets indicate that information was obtained from another part of the book than the title page. For the few atlases not yet catalogued in the UIUC library, brackets encase all the bibliographical information; such information was obtained from the *National Union Catalog of Pre-1956 Imprints.*
